TriggerSource [Enum] R/W

Determines how an image frame is initiated within an acquisition stream.

Note	An acquisition stream must be started in order to trigger/receive individual frames. For *Freerun* and *FixedRate* the first frame is synchronized to *AcquisitionStart* trigger.

Freerun	[Default] Camera runs at maximum supported frame rate depending on the exposure time and region of interest size
Line1	External trigger *Line1*
Line2	External trigger *Line2*
Line3	External trigger *Line3*
Line4	External trigger *Line4*
FixedRate	Camera self-triggers at a fixed frame rate defined by AcquisitionFrameRateAbs
Software	Software initiated image capture
